

Boundless Security Systems, Inc

low power outdoor wireless covert camera systems

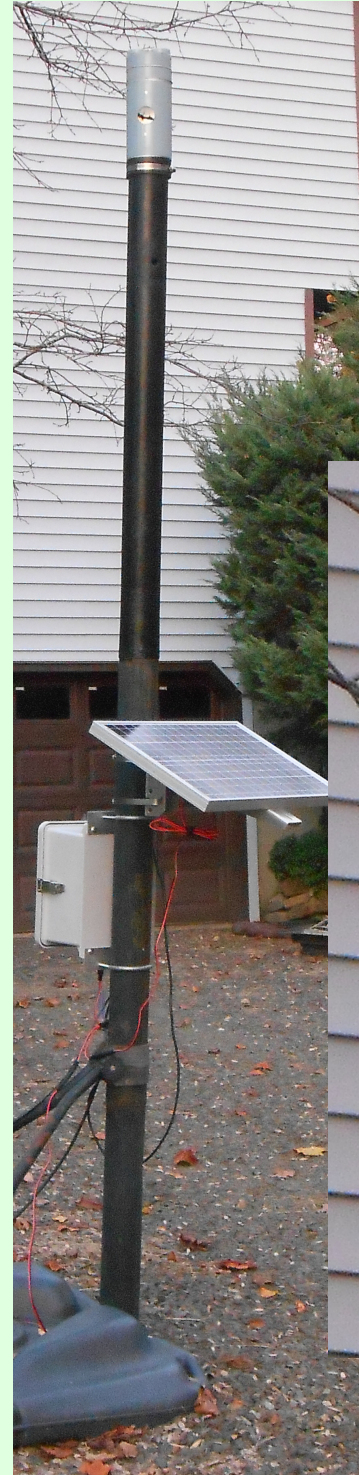

Rapid deployment
Solar- and battery-powered
Hidden utility pole surveillance cameras
Police covert utility pole surveillance cameras
Law enforcement covert pole cameras
User-concealable covert ground cameras
Covert traffic cone barrel camera
Police surveillance equipment
Pattern of life
ONVIF-compatible IP PTZ camera

The Rabbit: Ultra Low Power, Cylindrical Outdoor Covert Cellular PTZ Camera System

User-concealable, portable, inconspicuous, solar- and battery-operable, multi-orientation, ONVIF-compatible, outdoor covert cellular video surveillance system. Crime moves around. So should your outdoor video surveillance system.

Benefits

- Portable: Helps combat drug activity, vandalism, harassment, illegal dumping, car break ins, voting fraud...
- Multi-purpose: Can be used high, exposed on a pole or low, on the ground, in a user-supplied concealment
- Multi-orientation: use in any 90-degree orientation with proper pan-tilt operation and full video resolution
- Ultra low power, cellular, digital 1080 HD video surveillance system in a small, inconspicuous enclosure, about 1 week 24/7 run time per ext 12V 50AH LiFePO4 battery
- Full remote control and access to its live and internally recorded normal and time-lapse video, and PTZ control from Internet via customer-supplied cellular data service
- Provides live video natively on mobile devices, and all functions in the Chrome browser on a PC, MacBook and Android, without any software installation required
- ONVIF-compatible PTZ control and 960x540 live video
- Provides continuous, sharp, 1920x1080 @ 10 frames/s video recording on internal high reliability storage (about 3+ weeks duration), plus internally created and stored, time-lapse video for viewing an hour's or a day's past activity over the air in *one minute* with very little data
- **Time-lapse Hour Files** have one snapshot every 2.5 seconds to help spot when pedestrian traffic occurred
- **Time-lapse Day Files** have one snapshot every 5 minutes to help spot when vandalism occurred, a object was left or removed, or monitor construction progress
- Unique **forward-pivot pan-tilt movement** provides true, motorized, remotely controlled, pan-tilt-zoom (PTZ) camera movement (about 75 deg. max. horiz. viewing range) with a small, 1.5" dia., glass camera window
- Sharp, low distortion, remotely controlled 10X zoom lens enables user to read license plates at up to 450 ft
- Uses Boundless' cloud-based Portal for user interface, software updates, status reports, remote power management, and APPS including **Image Timelines**
- User supplies cell service, battery, and opt. solar panel, concealment, and pole (portable basketball pole shown)

Custom built and configured in USA by a woman-owned small business

Rugged, weatherproof, inconspicuous, aluminum housing

Example exposed use with solar power and 3.5" portable pole, only Cylindrical PTZ Camera System is provided.

Cylindrical PTZ Camera System is 4+'' dia., and 9'' high including pancake antennas, is stationary on pole. Aim it at the area you want to view. Color varies.

Boundless Security Systems, Inc

low power outdoor wireless covert camera systems

- Rapid deployment
- Solar- and battery-powered
- Hidden utility pole surveillance cameras
- Police covert utility pole surveillance cameras
- Law enforcement covert pole cameras cams
- User-concealable covert ground cameras
- Covert traffic cone barrel camera
- Police surveillance equipment
- Pattern of life

Many Ways to Conceal Boundless' *The Rabbit*: Ultra Low Power, Cylindrical Outdoor Covert Cellular PTZ Camera System, and a Small Battery Preferred for Special Operations – No Utility Pole Required

Non-metallic, hollow fence posts and bollard covers with at least 4+” ID

Non-metallic tall traffic cones, traffic channelizer cones and bollard covers, with at least 4+” ID at the vertical center, and traffic barrels and storage drums

In passenger vehicle or roof carrier

4+” ID or greater PVC pipe on roof, or inside service vehicle

Plastic drain or sewer pipe with at least 4+” ID

Concealments not included

Ghillie Suit

Faux Wasp Nest

In non-metallic optical fiber splice tubes and broadband Internet enclosures

Faux rocks and logs

Mount *The Rabbit*™ horizontally or vertically for wide utility and still have proper video and pan-tilt
