Call us **NOW** if you need:

- To remotely monitor the safety and operation of multiple facilities
  - To deter, intervene or investigate criminals and terrorists
  - Improved recorded image quality
  - To avoid network interference with core enterprise applications
  - Longer online storage duration
  - Continuous video recording to avoid missing any events
  - Easy and economical retrofit of existing CCTV systems
  - 25+% reduction in installation cost in both new and old construction
  - Onsite video monitoring @ 30 fps without a video matrix switch
  - To view multiple video streams at high frame rate via slow connections to the Internet
  - A digital video management system that survives criminal and terrorist attacks to disable it
  - Video access for first-responders enroute via hand held devices
  - Ease of installation and large storage capacity of an IP-based video system with the low network traffic of digital video recorders
  - To display many live and/or recorded video streams at once on a PC, TV or HDTV video monitor
  - Non-proprietary hardware throughout to avoid sole-source supply & maintenance problems

## Checklist for Digital Video Security Systems

- Have you been disappointed by poor recorded images, inadequate storage duration, or poor system reliability ?
- Are you choosing between digital video recorders and a network video recorder, but concerned about flooding your network with surveillance video ?
- Do you want to view live video at 30 frames per second, to display multiple live and/or recorded video streams on each of many TV monitors simultaneously, independently of one another, or to avoid a video matrix switch ?
- Do you want to avoid problems with proprietary hardware and closed software platforms ?
- Do you want a resilient, survivable system that keeps operating despite hardware faults, and criminal and terrorist attempts to disable or destroy it ?
- Do you need secure, wireless video ?
- Are you retrofitting an existing CCTV system, have mobile cameras or cameras or monitors spread over a large area, or do you want to reduce installation costs of a new video system ?
- Do you need a system that simultaneously satisfies the competing video quality, storage, communications and display needs for investigations, monitoring and first-responders ?
- Is there limited communications speed from the video system to the Internet, between sites via an Intranet, or from the Internet to users ?
- Do you want Internet access to surveillance video but concerned about network security or a Cyber attack ?
- Do you want to use a few HDTV monitors instead of many TV monitors ?
- Do you want a fully scalable system that can grow with you and whose operation can be sustained for many years ?

**Call us NOW if you answer YES to any of these questions !**

**Boundless Security System™**  
provides reliable protection in the air, on land, and at sea

**Boundless Security System™**  
is the only new digital video surveillance technology described in **Aviation and Airport Security: Terrorism and Safety Concerns** (Prentice Hall, Nov. 2003)
